

Marsilli @ Productronica 2007

The world's leading trade fair for electronics production

Castelleone, 7th November 2007

For the electronic equipment manufacturers competing on the European market there is no better opportunity than Productronica exhibition in Munich to meet its customers, having the opportunity to understand their needs.

Marsilli presence in Productronica exhibition since 1985 demonstrates the company determination in building-up customer relationships, defining, in function of the market indications, the next-years group's strategy.

Marsilli is glad to invite all the exhibition guests to visit his 160 square meters booth, in the new Munich Trade Show Centre - Hall A6-357 since November 13th to 16th.

A visiting path will drive the guest through the different solutions proposed by Marsilli as:

Stand Alone Winders:

- Mars 12-80 Winder with bifilar technique

Semi-automatic coil production cells:

- BW8-60 Winder with skeining device
- FNT3 Fluxing and Soldering turret machine

Automatic coil production lines:

- FAST Pallet automatic line
- Terminal insertion
- MARS 16-60 winder
- Terminal Bending
- Fluxing
- Soldering
- Ohmic and Surge Testing
- Final Palletizing

To share the experience on wire-connection processes, a specific lab area is equipped to offer the visitors the possibility to experience live demonstration of the following technologies:

- Resistance Welding
- Thermo-compression bonding
- Programmable wire stripping
- Pulsed Arc Spot Welding
- Pump Soldering
- Precise wire tensioning

Take advantage of this opportunity to come and see us, our staff will be pleased to give your further information on our new project plus of course on all of Marsilli range of products. Please let us know if you would like to receive an invitation ticket, we will send it to you within a few days.

If a visit to the show is not in program you can visit our web site, where you will find interesting information on the Marsilli group at www.marsilli.com
